

Important Guidelines

- Enable GPS/Location on Android Phone
- Use Updated Version of Anti-Dengue Application
- GPS should be activated, so that activity can be mapped on Google Maps in the system accurately
- Internet availability is necessary to fetch hotspots and to upload activities
- App contains main menu including;

✓ **Dashboard:**

Consists of 5 categories under which different activity tags are available. All categories are assigned to department users as per the Dengue SOPs 2020

- a. Larva
 - b. Hotspot
 - c. General
 - d. Patient
 - Patients Tagging
 - Patients Spray
 - e. House keeping
- ✓ **Sync:** Sync the registered or updated hotspot record from Anti-dengue system
 - ✓ **My Activities:** Saved activities can be submitted collectively by clicking on *send all* button and individually by clicking on *submit* button from My Activities tab in main menu. *Delete* button will delete a particular activity and *delete all* button will delete all saved activities.
 - ✓ **Profile:** View profile that contains username, district, department and town.
 - ✓ **Log Out:** Logout from specific login. Make sure all saved activities are send before logging out otherwise the data will be removed and will not reflect on the dashboard
